FOR RELEASE: May 30, 2014

DPW Construction Projects: 2014 Sewer Rehabilitation

Construction is anticipated to begin June 2, 2014

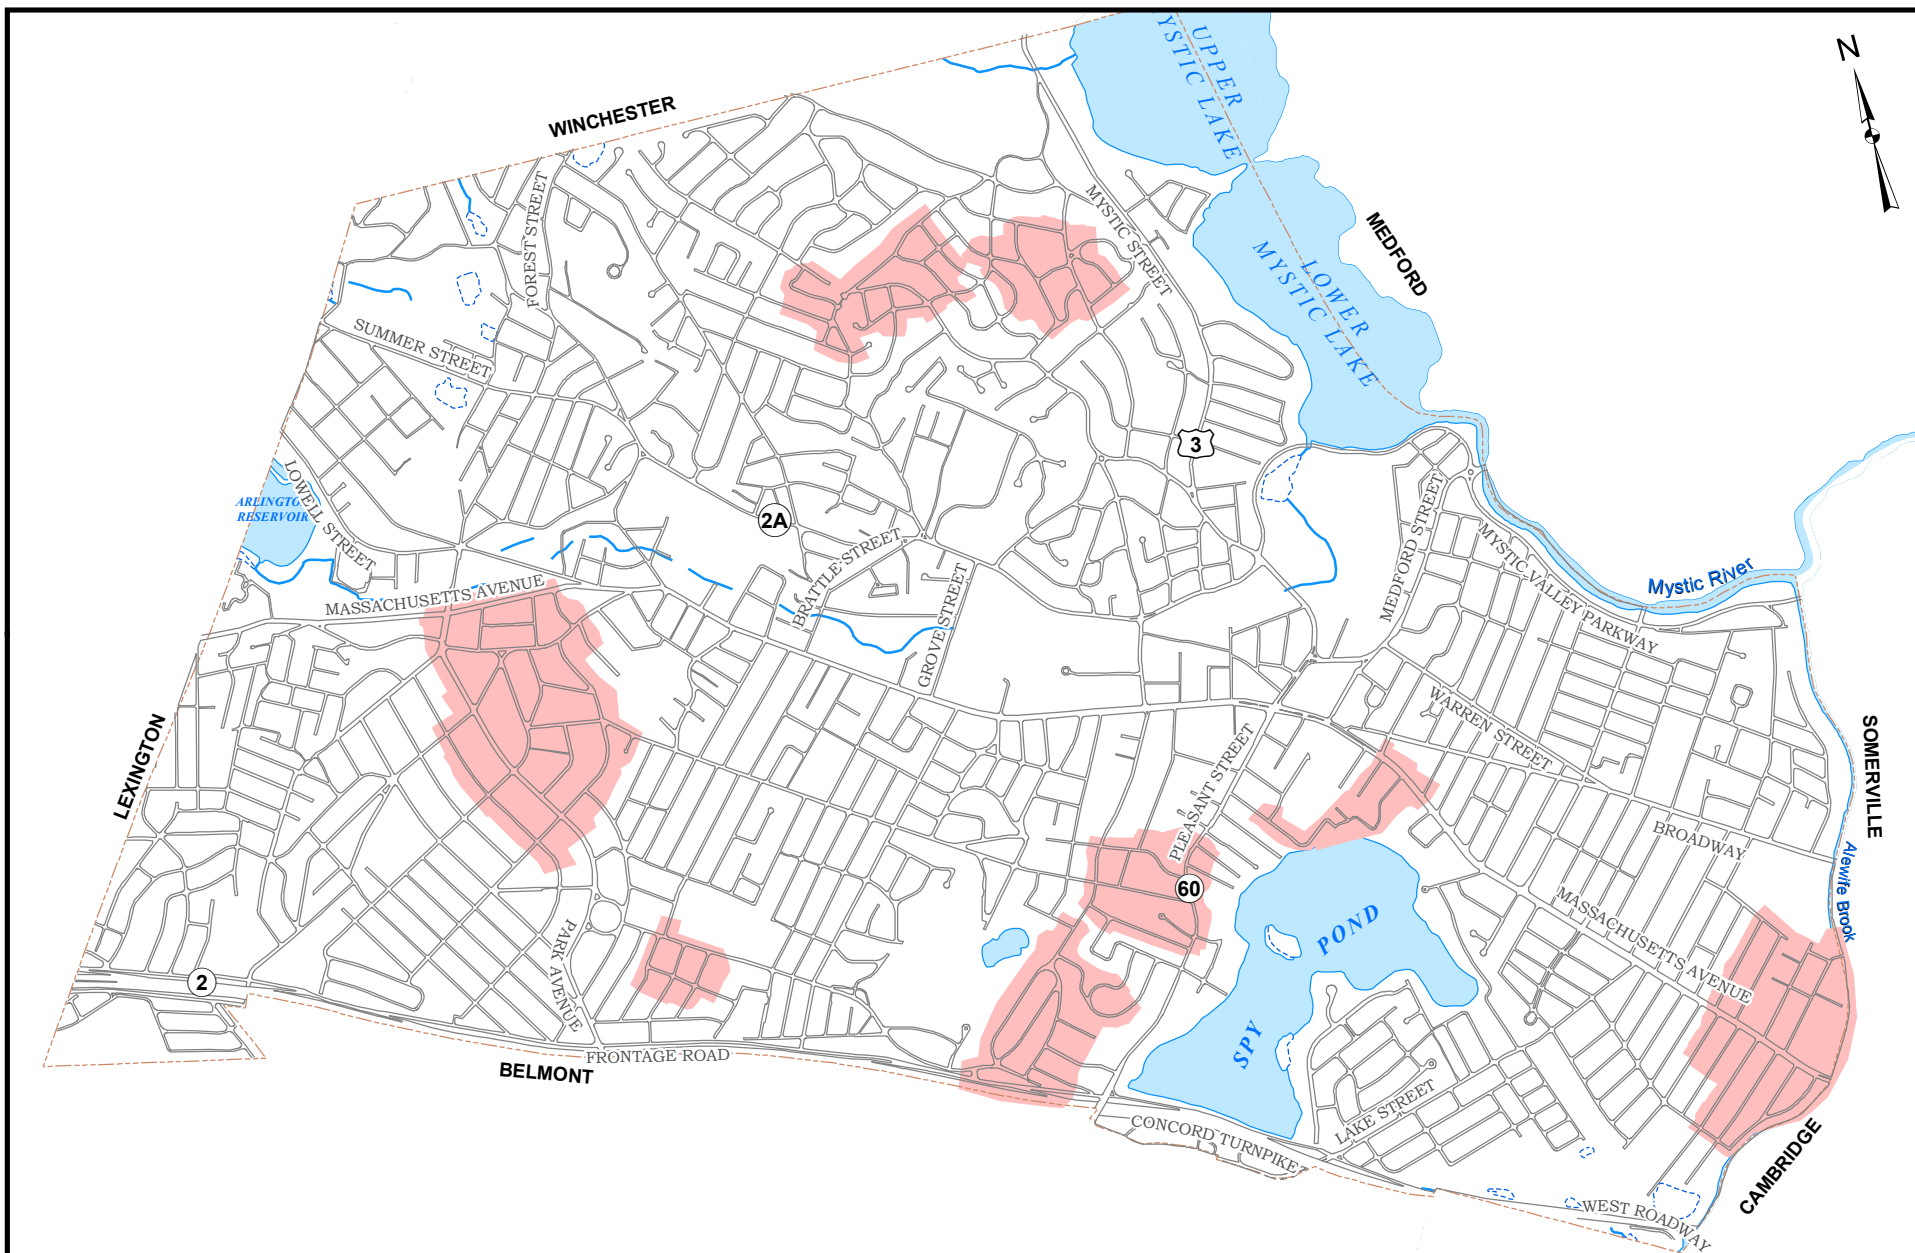

As part of the Town's ongoing Sewer System Investigation and Planning Program (SSIPP), the Department of Public Works will be coordinating the rehabilitation of various sewer improvements throughout the Town. The necessary work was identified through an investigation program and will correct sewer deficiencies and remove sources of infiltration and exfiltration through a number of corrective repairs and improvements including:

- Root treatment
- relining of manholes
- manhole installation
- cured-in-place pipe lining
- Dig & replace spot sewer repairs

Project areas are located in various locations throughout Town (see map).

It is anticipated that work will begin June 2, 2014 and will extend into Summer of 2014 (weather dependent). During this time residents should expect some on-street parking restrictions to allow for equipment and construction activities. The contractor will make every effort to keep inconveniences to a minimum and traffic police details will be present to aid in driveway access/egress and roadway safety. Residents are requested to observe on-street roadway postings, detour signs and traffic message boards to aid traffic management efforts. Residents traveling through these areas should plan accordingly, allow for travel delays, and should consider alternative routes when possible.

Further notices will be provided to abutters as necessary. Updates will be posted online at arlingtonma.gov/dpwprojects. The Department of Public Works would like to thank residents for their cooperation during these improvement projects.
